

Inventory Manager affords State Transportation Agencies the ability to manage and maintain inventory attribute data using an intuitive tabular based editor. The solution is fully integrated with the GIS and underlying LRS forming the backbone for the enterprise data integration and maintenance. Avoid data inconsistencies and keep business data current by saving changes to the source location.

About PMG

PMG is a transportation software company offering a comprehensive technology stack for DOTs backed by a full complement of consulting services and world class customer support. We are focused on helping DOTs manage assets, project budgets and project life cycles using the latest geospatial technologies.

- Supports both linear referenced & off-route data features
- Includes functionality for both graphic and tabular data editing
- Allows for bulk data loading
- Provides data pre-load QA/QC validations
- Inventory Manager Mobile supports inventory collection by field crews
- Can be fully integrated with HPMS Manager for a complete solution for annual HPMS submission

A central hub for the collection, validation, and maintenance of all inventory attribute data.
