

pmgP2S

The **pmgP2S** product affords the ability to plan, program, and maintain projects in an intuitive, web based, spatially enabled interface. Our product allows users to create projects by entering pertinent information, including funding sources and the locations affected. Once the planning phase is complete, the project is ready to be programmed where funds can be obligated and authorized. Not only can you follow the project throughout its entire lifecycle, our solution automates the approval workflow process for obligating funds. Our product is designed to be tightly coupled and share data with a host of complementary systems as it moves through the project programming process.

About PMG

PMG is a transportation software company offering a comprehensive technology stack for DOTs backed by a full complement of consulting services and world class customer support. We are focused on helping DOTs manage assets, project budgets and project life cycles using the latest geospatial technologies.
